FOREWORD

1. Introduction

This document contains abbreviations and codes approved by the Council of ICAO for worldwide use in the international aeronautical telecommunication service and in aeronautical information documents, as appropriate, uniform abbreviated phraseology for use in pre-flight information bulletins and ATS data link communications, with the status of Procedures for Air Navigation Services (in abbreviated form the PANS-ABC).

This document is the outgrowth of study by the Air Navigation Commission in consultation with States in the matter of controlling and coordinating abbreviations and codes. It brings together all abbreviations and codes for use in aircraft operations with the following exceptions:

- a) *Designators for Aircraft Operating Agencies, Aeronautical Authorities and Services* promulgated in Doc 8585.
- b) Data designators and geographical designators for meteorological bulletins given in the *Manual of Aeronautical Meteorological Practice* (Doc 8896).
- c) Aeronautical meteorological codes given in the *Manual of Aeronautical Meteorological Practice*.
- d) Additional abbreviations for restricted use in aeronautical information services (AIS) documents given in the *Aeronautical Information Services Manual* (Doc 8126).
- e) *Location Indicators* given in Doc 7910.
- f) *Aircraft Type Designators* given in Doc 8643.

Table A shows the origin of each edition of the PANS-ABC issued since 1964 and subsequent amendments thereto, together with a list of the principal subjects involved, the dates on which the amendments were approved by the Council and the dates on which they became applicable.

2. Principles for formulation of abbreviations

The principles applied in the formulation of ICAO abbreviations are:

- a) that allocation of more than one signification to a single abbreviation should be avoided except where it can be reasonably determined that no instances of misinterpretation would arise;
- b) that allocation of more than one abbreviation to the same signification should be avoided even though a different use is prescribed;
- c) that abbreviations should make use of the root word or words and should be derived from words common to the working languages except that where it is impracticable to apply this principle to best advantage, the abbreviation should follow the English text;
- d) that the use of a singular or plural form for the signification of an abbreviation should be selected on the basis of the more common use;

- e) that an abbreviation may represent grammatical variants of the basic signification where such application can be made without risk of confusion and the desired grammatical form can be determined from the context of the message.

With respect to the latter principle, several variants are given for a number of abbreviations where it might not be obvious that the variant is appropriate or acceptable.

3. Specifications governing the use of abbreviations

Specifications governing the use of abbreviations and codes are contained in the following ICAO Annexes and PANS:

- a) use of abbreviations in the aeronautical information service: 3.6.4 of Annex 15;
- b) use of the NOTAM Code: 5.2 of Annex 15;
- c) use of abbreviations and codes in the international aeronautical telecommunications service: 3.7 of Annex 10, Volume II;
- d) use of abbreviations on aeronautical charts: 2.3.3 and 2.9 of Annex 4;
- e) use of abbreviations in plain language meteorological messages: Chapters 3, 4, 6 and 7, Appendices 1, 2 and 5 and Attachment A of Annex 3;
- f) use of abbreviations in air-reports: 4.12 of Chapter 4 and Appendix 1 of PANS-ATM (Doc 4444);
- g) use of abbreviations and designators in flight plans and other air traffic services messages: Chapters 11 and 16 and Appendices 2, 3, 5 and 6 of PANS-ATM (Doc 4444).

4. Status

The Procedures for Air Navigation Services (PANS) do not have the same status as the Standards and Recommended Practices. While the latter are adopted by Council in pursuance of Article 37 of the Convention on International Civil Aviation, subject to the full procedure of Article 90, the PANS are approved by the President of the Council on behalf of the Council and recommended to Contracting States for worldwide application.

5. Implementation

The implementation of ICAO Standards, Recommended Practices and Procedures is the responsibility of Contracting States; they are applied in actual operations only after, and in so far as States have enforced them. However, with a view to facilitating their processing towards implementation by States, this document has been prepared in a manner which will permit direct use by operational personnel.

6. Notification of Differences

The PANS do not carry the status afforded to Standards adopted by the Council as Annexes to the Convention and, therefore, do not come within the obligation imposed by Article 38 of the Convention to notify differences in the event of non-implementation.

The attention of States is, however, drawn to the provision in Annex 15 related to the publication in Aeronautical Information Publications of a list of abbreviations and their respective significations used by the State in its Aeronautical Information Publications and in the dissemination of aeronautical information. Differences from ICAO abbreviations or their significations should be identified.

7. Editorial presentation

For encoding purposes the abbreviations given in this document are divided among a “general” and several specialized categories. For the convenience of the user, there is some duplication among these categories. Nevertheless, it may be necessary to draw on the “general” category of abbreviations when composing messages using one of the specialized categories.

Certain Q Code signals which through constant use have attained plain language status have been placed with their plain language significations in the portion of this document which contains the “general” category abbreviations.

Throughout the document, decode material is printed on white paper, encode material on green paper.

Any errors, omissions or discrepancies should be brought to the attention of the Secretary General of ICAO, 999 University Street, Montréal, Quebec, Canada H3C 5H7.

Table A. Amendments to the PANS-ABC

<i>Amendment</i>	<i>Source(s)</i>	<i>Subject(s)</i>	<i>Approved Applicable</i>
1st Edition (1964)	Air Navigation Commission	Study on the control and coordination of abbreviations and codes.	18 March 1964 1 November 1964
Amendment 1	MET/OPS Meeting (1964); Fifth Meeting of the Panel of Teletypewriter Specialists (1963)	Editorial and consequential amendments emanating from Amendment 44 to Annex 10, Amendment 9 to PANS-MET and Amendment 7 to PANS-RAC; addition and modification of meteorological abbreviations; amendment of abbreviations used on the AFTN.	7 June 1965 10 March 1966
Amendment 2	ICAO Secretariat	Consequential and editorial changes to the Foreword emanating from Air Navigation Commission and Council action on various regulatory and service documents.	25 August 1966
2nd Edition (1967) (includes Amendment 3)	AIS/MAP Divisional Meeting (1966)	Various changes to abbreviations and codes to reflect current operational requirements and practices.	13 June 1967 8 February 1968
Amendment 4	Air Navigation Commission	Consequential changes to abbreviations used for air traffic purposes emanating from Amendment 2 to the Eighth Edition of Doc 4444 (PANS-RAC).	4 April 1968 4 April 1968
Amendment 5	Air Navigation Commission	Consequential changes to abbreviations used for plain language meteorology messages, emanating from Amendment 14 to Doc 7605 (PANS-MET).	28 June 1968 9 January 1969
Amendment 6	Air Navigation Commission	Changes arising from Assembly Resolution A16-19 and Amendment 54 to Annex 3.	23 January 1969 18 September 1969

<i>Amendment</i>	<i>Source(s)</i>	<i>Subject(s)</i>	<i>Approved Applicable</i>
3rd Edition (1971) (includes Amendments 7 and 8)	Air Navigation Commission	Study of NOTAM composition resulting in expanded use of abbreviations and codes in NOTAM Class I; changes in abbreviations emanating from revised aeronautical meteorological figure codes introduced by WMO; changes introduced as a result of clarification of air traffic control terms contained in ICAO regulatory documents.	19 March 1971 6 January 1972
Amendment 9	Air Navigation Commission	Consequential changes emanating from Amendment 1 to the Tenth Edition of Doc 4444 (PANS-RAC).	24 March 1972 7 December 1972
Amendment 10	Air Navigation Commission; Third Meeting of the Obstacle Clearance Panel (1971)	Consequential amendments to abbreviations and their significations (QFE and QNH); changes to meteorological abbreviations introduced by WMO.	21 March 1973 16 August 1973
Amendment 11	Air Navigation Commission; Seventh Air Navigation Conference (1972)	Addition of abbreviations RNAV and STAR; deletion of abbreviation SIA.	29 May 1973 23 May 1974
Amendment 12	Air Navigation Commission	Inclusion of additional abbreviations for use in the NOTAM Code.	11 December 1974 9 October 1975
Amendment 13	Air Navigation Commission; Eighth Air Navigation Conference (1974)	Additions, deletions and changes in significations of abbreviations mainly emanating from amendments to Annex 3.	8 December 1975 12 August 1976
Amendment 14	Air Navigation Commission; Ninth Air Navigation Conference (1976)	Addition of abbreviations COP, INOP, MRP, RPS and WPT; change in signification of abbreviation ACP as a consequence of Amendment 30 to Annex 14.	9 December 1977 10 August 1978
Amendment 15	Air Navigation Commission	Additions and changes in signification of abbreviations.	26 February 1979 29 November 1979
Amendment 16	Air Navigation Commission	Additions, deletions and changes in signification of abbreviations emanating from a study of abbreviations in common use in States' aeronautical information publications.	11 March 1981 26 November 1981
Amendment 17	Air Navigation Commission	Extensive amendment of abbreviations and codes emanating from a proposal submitted by the United Kingdom.	14 December 1981 9 June 1983
Amendment 18	Air Navigation Commission	Extensive addition of abbreviations and codes consequential to a study of the revision of the NOTAM Code; addition of abbreviations used in Doc 8168 (PANS-OPS).	11 June 1982 9 June 1983
Amendment 19	Air Navigation Commission; Third Meeting of the ATS Data Acquisition, Processing and Transfer (ADAPT) Panel (1981)	Consequential changes emanating from Amendments 64 and 65 to Annex 3, Amendment 14 to Annex 5, Recommendations 1/5 and 3/1 of ADAPT/3, and a new ITU method of designating radio emissions.	15 March 1985 21 November 1985

<i>Amendment</i>	<i>Source(s)</i>	<i>Subject(s)</i>	<i>Approved Applicable</i>
4th Edition (1989) (includes Amendment 20)	Air Navigation Commission	Additions, changes and deletions of abbreviations and codes to reflect the current operational requirements and practices; introduction of new sections for abbreviations used in radiotelephony in a spoken form (Decode, Encode) and for the Procedure signals used in aeronautical telecommunication service (Decode); consequential and editorial amendments.	24 February 1989 16 November 1989
Amendment 21	Air Navigation Commission; Communications/ Meteorology/ Operations (COM/MET/OPS) Divisional Meeting (1990)	Additions, changes and deletions of abbreviations and codes to reflect the current operational requirements and practices; consequential amendments arising from Amendment 69 to Annex 3, Amendment 13 to Annex 5, Amendment 39 to Annex 14, Amendment 27 to Annex 15 and Amendment 13 to PANS-OPS.	2 December 1992 1 July 1993
Amendment 22	Air Navigation Commission	Consequential changes emanating from: Amendment 70 to Annex 3 Amendment 69 to Annex 10 Amendment 15 to Annex 12 Amendment 28 to Annex 15 Amendment 7 to PANS-OPS, Volume I.	30 November 1995 7 November 1996
5th Edition (1999) (includes Amendment 23)	AIS/MAP Divisional Meeting (1998); Air Navigation Commission	Extensive amendments emanating from the AIS/MAP Divisional Meeting (1998) and the Air Navigation Commission, including additions, changes and deletions of abbreviations; addition and deletion of abbreviations and terms transmitted as spoken words; addition of abbreviations and terms transmitted using the individual letters in non-phonetic form; addition of a NOTAM Code for controller-pilot data link communications and automatic dependent surveillance; deletion of Procedure Signals for use in the International Aeronautical Telecommunication Service (Decode and Encode); deletion of the Q-Code (Preface, Decode and Encode).	26 February 1999 4 November 1999
Amendment 24	Air Navigation Commission	Consequential changes emanating from Amendment 71 to Annex 3.	9 June 2000 2 November 2000
Amendment 25	Air Navigation Commission	Consequential changes emanating from Amendment 72 to Annex 3.	10 July 2002 28 November 2002
Amendment 26	Conclusion 40/51 b) of the European Air Navigation Planning Group (EANPG) and the Secretariat	Consequential changes emanating from Amendment 32 to Annex 15.	23 July 2003 27 November 2003
Sixth Edition (2004) (includes Amendment 27)	Global Navigation Satellite System Panel (GNSSP/4); MET Divisional Meeting (2002); Air Navigation Commission	New abbreviations and updated specifications for the NOTAM Code related to GNSS; and consequential changes emanating from Amendment 73 to Annex 3, Amendment 53 to Annex 4 and Amendments 13 and 12 to the PANS-OPS, Volumes I and II, respectively.	6 May 2004 25 November 2004
Seventh Edition (2007) (includes Amendment 28)	Fourteenth Meeting of the Obstacle Clearance Panel (OCP/14); Air Navigation Commission; and the Secretariat	New abbreviations related to updated provisions in the PANS-OPS; the use of ADS-B, ADS-C and RCP in the provision of air traffic services; consequential changes emanating from Amendment 74 to Annex 3 and Amendment 34 to Annex 15; and editorial amendments.	3 August 2007 22 November 2007

<i>Amendment</i>	<i>Source(s)</i>	<i>Subject(s)</i>	<i>Approved Applicable</i>
Amendment 29	First working group of the whole meeting of the Instrument Flight Procedures Panel (IFPP/WG/WHL/1); Secretariat, with the assistance of the Required Navigation Performance and Special Operational Requirements Study Group (RNPSORSG), concerning PBN terminology	New abbreviations related to updated provisions in the PANS-OPS with regard to the performance-based navigation (PBN) concept and ground-based augmentation system (GBAS) landing system.	7 October 2008 20 November 2008
Eighth Edition (2010) (includes Amendment 30)	Ninth meeting of the Operations Panel Working Group of the Whole (OPSP/WG-WHL/9); sixth meeting of the Operations Panel (OPSP/6); and the Secretariat with the assistance of the Aeronautical Information Management Study Group (AIS-AIMSG/1), International Airways Volcano Watch Operations Group (IAVWOPSG/4), Meteorological Warnings Study Group (METWSG/2), and Aerodrome Meteorological Observation and Forecast Study Group (AMOFSG/7).	New abbreviations related to cockpit displays, unmanned aircraft, volcanic ash information provided by volcanic ash advisory centres (VAAC), the elimination of routine voice reports, completion of tropical cyclone advisories in graphical format and the use of data link for meteorological information, aerodrome observations and forecasts. Update of the NOTAM code.	23 July 2010 18 November 2010

ABBREVIATIONS

DECODE

A			
A	Amber		ADR
AAA	(or AAB, AAC . . . etc., in sequence)		ADS*
	Amended meteorological message (message type designator)		
A/A	Air-to-air		ADS-B‡
AAD	Assigned altitude deviation		
AAIM	Aircraft autonomous integrity monitoring		ADS-C‡
AAL	Above aerodrome level		ADSU
ABI	Advance boundary information		ADVS
ABM	Abeam		ADZ
ABN	Aerodrome beacon		AES
ABT	About		AFIL
ABV	Above		AFIS
AC	Alto cumulus		AFM
ACARS†	(to be pronounced "AY-CARS") Aircraft communication addressing and reporting system		AFS
ACAS†	Airborne collision avoidance system		AFT . . .
ACC‡	Area control centre or area control		AFTN‡
ACCID	Notification of an aircraft accident		A/G
ACFT	Aircraft		AGA
ACK	Acknowledge		AGL
ACL	Altimeter check location		AGN
ACN	Aircraft classification number		AIC
ACP	Acceptance (message type designator)		AIDC
ACPT	Accept or accepted		AIP
ACT	Active or activated or activity		AIRAC
AD	Aerodrome		AIREP†
ADA	Advisory area		AIRMET†
ADC	Aerodrome chart		
ADDN	Addition or additional		AIS
ADF‡	Automatic direction-finding equipment		ALA
ADIZ†	(to be pronounced "AY-DIZ") Air defence identification zone		
ADJ	Adjacent		
ADO	Aerodrome office (specify service)		

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

ALERFA†	Alert phase	ARS	Special air-report (<i>message type designator</i>)
ALR	Alerting (<i>message type designator</i>)	ARST	Arresting (<i>specify (part of) aircraft arresting equipment</i>)
ALRS	Alerting service	AS	Altostratus
ALS	Approach lighting system	ASC	Ascend to <i>or</i> ascending to
ALT	Altitude	ASDA	Accelerate-stop distance available
ALTN	Alternate <i>or</i> alternating (<i>light alternates in colour</i>)	ASE	Altimetry system error
ALTN	Alternate (<i>aerodrome</i>)	ASHTAM	Special series NOTAM notifying, by means of a specific format, change in activity of a volcano, a volcanic eruption and/or volcanic ash cloud that is of significance to aircraft operations
AMA	Area minimum altitude	ASPH	Asphalt
AMD	Amend <i>or</i> amended (<i>used to indicate amended meteorological message; message type designator</i>)	AT . . .	At (<i>followed by time at which weather change is forecast to occur</i>)
AMDT	Amendment (<i>AIP Amendment</i>)	ATA‡	Actual time of arrival
AMS	Aeronautical mobile service	ATC‡	Air traffic control (<i>in general</i>)
AMSL	Above mean sea level	ATCSMAC . . .	Air traffic control surveillance minimum altitude chart (<i>followed by name/title</i>)
AMSS	Aeronautical mobile satellite service	ATD‡	Actual time of departure
ANC . . .	Aeronautical chart — 1:500 000 (<i>followed by name/title</i>)	ATFM	Air traffic flow management
ANCS . . .	Aeronautical navigation chart — small scale (<i>followed by name/title and scale</i>)	ATIS†	Automatic terminal information service
ANS	Answer	ATM	Air traffic management
AOC . . .	Aerodrome obstacle chart (<i>followed by type and name/title</i>)	ATN	Aeronautical telecommunication network
AP	Airport	ATP . . .	At . . . (<i>time or place</i>)
APAPI†	(<i>to be pronounced “AY-PAPI”</i>) Abbreviated precision approach path indicator	ATS	Air traffic services
APCH	Approach	ATTN	Attention
APDC . . .	Aircraft parking/docking chart (<i>followed by name/title</i>)	AT-VASIS†	(<i>to be pronounced “AY-TEE-VASIS”</i>) Abbreviated T visual approach slope indicator system
APN	Apron	ATZ	Aerodrome traffic zone
APP	Approach control office <i>or</i> approach control <i>or</i> approach control service	AUG	August
APR	April	AUTH	Authorized <i>or</i> authorization
APRX	Approximate <i>or</i> approximately	AUW	All up weight
APSG	After passing	AUX	Auxiliary
APV	Approve <i>or</i> approved <i>or</i> approval	AVBL	Available <i>or</i> availability
ARC	Area chart	AVG	Average
ARNG	Arrange	AVGAS†	Aviation gasoline
ARO	Air traffic services reporting office	AWTA	Advise at what time able
ARP	Aerodrome reference point	AWY	Airway
ARP	Air-report (<i>message type designator</i>)	AZM	Azimuth
ARQ	Automatic error correction		
ARR	Arrival (<i>message type designator</i>)		
ARR	Arrive <i>or</i> arrival		

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

B

B	Blue
BA	Braking action
BARO-VNAV†	(to be pronounced “BAA-RO-VEE-NAV”) Barometric vertical navigation
BASE†	Cloud base
BCFG	Fog patches
BCN	Beacon (<i>aeronautical ground light</i>)
BCST	Broadcast
BDRY	Boundary
BECMG	Becoming
BFR	Before
BKN	Broken
BL . . .	Blowing (<i>followed by DU = dust, SA = sand or SN = snow</i>)
BLDG	Building
BLO	Below clouds
BLW . . .	Below . . .
BOMB	Bombing
BR	Mist
BRF	Short (<i>used to indicate the type of approach desired or required</i>)
BRG	Bearing
BRKG	Braking
BS	Commercial broadcasting station
BTL	Between layers
BTN	Between
BUFR	Binary universal form for the representation of meteorological data

C

. . . C	Centre (<i>preceded by runway designation number to identify a parallel runway</i>)
C	Degrees Celsius (<i>Centigrade</i>)
CA	Course to an altitude
CAT	Category
CAT	Clear air turbulence

CAVOK†	(to be pronounced “KAV-OH-KAY”) Visibility, cloud and present weather better than prescribed values or conditions
CB‡	(to be pronounced “CEE BEE”) Cumulonimbus
CC	Cirrocumulus
CCA	(or CCB, CCC . . . etc., in sequence) Corrected meteorological message (<i>message type designator</i>)
CD	Candela
CDN	Coordination (<i>message type designator</i>)
CF	Change frequency to . . .
CF	Course to a fix
CFM*	Confirm or I confirm (<i>to be used in AFS as a procedure signal</i>)
CGL	Circling guidance light(s)
CH	Channel
CH#	This is a channel-continuity-check of transmission to permit comparison of your record of channel-sequence numbers of messages received on the channel (<i>to be used in AFS as a procedure signal</i>)
CHEM	Chemical
CHG	Modification (<i>message type designator</i>)
CI	Cirrus
CIDIN†	Common ICAO data interchange network
CIT	Near or over large towns
CIV	Civil
CK	Check
CL	Centre line
CLA	Clear type of ice formation
CLBR	Calibration
CLD	Cloud
CLG	Calling
CLIMB-OUT	Climb-out area
CLR	Clear(s) or cleared to . . . or clearance
CLRD	Runway(s) cleared (<i>used in METAR/SPECI</i>)
CLSD	Close or closed or closing
CM	Centimetre
CMB	Climb to or climbing to

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

CMPL	Completion <i>or</i> completed <i>or</i> complete	D	
CNL	Cancel <i>or</i> cancelled	D	Downward (<i>tendency in RVR during previous 10 minutes</i>)
CNL	Flight plan cancellation (<i>message type designator</i>)	D . . .	Danger area (<i>followed by identification</i>)
CNS	Communications, navigation and surveillance	DA	Decision altitude
COM	Communications	D-ATIS [†]	(<i>to be pronounced "DEE-ATIS"</i>) Data link automatic terminal information service
CONC	Concrete	DCD	Double channel duplex
COND	Condition	DCKG	Docking
CONS	Continuous	DCP	Datum crossing point
CONST	Construction <i>or</i> constructed	DCPC	Direct controller-pilot communications
CONT	Continue(s) <i>or</i> continued	DCS	Double channel simplex
COOR	Coordinate <i>or</i> coordination	DCT	Direct (<i>in relation to flight plan clearances and type of approach</i>)
COORD	Coordinates	DE*	From (<i>used to precede the call sign of the calling station</i>) (<i>to be used in AFS as a procedure signal</i>)
COP	Change-over point	DEC	December
COR	Correct <i>or</i> correction <i>or</i> corrected (<i>used to indicate corrected meteorological message; message type designator</i>)	DEG	Degrees
COT	At the coast	DEP	Depart <i>or</i> departure
COV	Cover <i>or</i> covered <i>or</i> covering	DEP	Departure (<i>message type designator</i>)
CPDLC [‡]	Controller-pilot data link communications	DEPO	Deposition
CPL	Current flight plan (<i>message type designator</i>)	DER	Departure end of the runway
CRC	Cyclic redundancy check	DES	Descend to <i>or</i> descending to
CRM	Collision risk model	DEST	Destination
CRZ	Cruise	DETRESFA [†]	Distress phase
CS	Call sign	DEV	Deviation <i>or</i> deviating
CS	Cirrostratus	DF	Direction finding
CTA	Control area	DFDR	Digital flight data recorder
CTAM	Climb to and maintain	DFTI	Distance from touchdown indicator
CTC	Contact	DH	Decision height
CTL	Control	DIF	Diffuse
CTN	Caution	DIST	Distance
CTR	Control zone	DIV	Divert <i>or</i> diverting
CU	Cumulus	DLA	Delay <i>or</i> delayed
CUF	Cumuliform	DLA	Delay (<i>message type designator</i>)
CUST	Customs	DLIC	Data link initiation capability
CVR	Cockpit voice recorder	DLY	Daily
CW	Continuous wave	DME [‡]	Distance measuring equipment
CWY	Clearway	DNG	Danger <i>or</i> dangerous
		DOM	Domestic
		DP	Dew point temperature

[†] When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

[‡] When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

DPT	Depth	EMBD	Embedded in a layer (<i>to indicate cumulonimbus embedded in layers of other clouds</i>)
DR	Dead reckoning	EMERG	Emergency
DR . . .	Low drifting (<i>followed by DU = dust, SA = sand or SN = snow</i>)	END	Stop-end (<i>related to RVR</i>)
DRG	During	ENE	East-north-east
DS	Duststorm	ENG	Engine
DSB	Double sideband	ENR	En route
DTAM	Descend to and maintain	ENRC . . .	Enroute chart (<i>followed by name/title</i>)
DTG	Date-time group	EOBT	Estimated off-block time
DTHR	Displaced runway threshold	EQPT	Equipment
DTRT	Deteriorate <i>or</i> deteriorating	ER*	Here . . . <i>or</i> herewith
DTW	Dual tandem wheels	ESE	East-south-east
DU	Dust	EST	Estimate <i>or</i> estimated <i>or</i> estimation (<i>message type designator</i>)
DUC	Dense upper cloud	ETA*‡	Estimated time of arrival <i>or</i> estimating arrival
DUPE#	This is a duplicate message (<i>to be used in AFS as a procedure signal</i>)	ETD‡	Estimated time of departure <i>or</i> estimating departure
DUR	Duration	ETO	Estimated time over significant point
D-VOLMET	Data link VOLMET	EUR RODEX	European regional OPMET data exchange
DVOR	Doppler VOR	EV	Every
DW	Dual wheels	EVS	Enhanced vision system
DZ	Drizzle	EXC	Except
E		EXER	Exercises <i>or</i> exercising <i>or</i> to exercise
E	East <i>or</i> eastern longitude	EXP	Expect <i>or</i> expected <i>or</i> expecting
EAT	Expected approach time	EXTD	Extend <i>or</i> extending
EB	Eastbound	F	
EDA	Elevation differential area	F	Fixed
EEE#	Error (<i>to be used in AFS as a procedure signal</i>)	FA	Course from a fix to an altitude
EET	Estimated elapsed time	FAC	Facilities
EFC	Expect further clearance	FAF	Final approach fix
EFIS†	(<i>to be pronounced “EE-FIS”</i>) Electronic flight instrument system	FAL	Facilitation of international air transport
EGNOS‡	(<i>to be pronounced “EGG-NOS”</i>) European geostationary navigation overlay service	FAP	Final approach point
EHF	Extremely high frequency [30 000 to 300 000 MHz]	FAS	Final approach segment
ELBA†	Emergency location beacon — aircraft	FATO	Final approach and take-off area
ELEV	Elevation	FAX	Facsimile transmission
ELR	Extra long range	FBL	Light (<i>used to indicate the intensity of weather phenomena, interference or static reports, e.g. FBL RA = light rain</i>)
ELT	Emergency locator transmitter		
EM	Emission		

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

FC	Funnel cloud (<i>tornado or water spout</i>)	FT	Feet (<i>dimensional unit</i>)
FCST	Forecast	FTE	Flight technical error
FCT	Friction coefficient	FTP	Fictitious threshold point
FDPS	Flight data processing system	FTT	Flight technical tolerance
FEB	February	FU	Smoke
FEW	Few	FZ	Freezing
FG	Fog	FZDZ	Freezing drizzle
FIC	Flight information centre	FZFG	Freezing fog
FIR‡	Flight information region	FZRA	Freezing rain
FIS	Flight information service		
FISA	Automated flight information service		
FL	Flight level	G	
FLD	Field	G	Green
FLG	Flashing	G . . .	Variations from the mean wind speed (gusts) (<i>followed by figures in METAR/SPECI and TAF</i>)
FLR	Flares	GA	Go ahead, resume sending (<i>to be used in AFS as a procedure signal</i>)
FLT	Flight	G/A	Ground-to-air
FLTCK	Flight check	G/A/G	Ground-to-air and air-to-ground
FLUC	Fluctuating <i>or</i> fluctuation <i>or</i> fluctuated	GAGAN†	GPS and geostationary earth orbit augmented navigation
FLW	Follow(s) <i>or</i> following	GAIN	Airspeed or headwind gain
FLY	Fly <i>or</i> flying	GAMET	Area forecast for low-level flights
FM	Course from a fix to manual termination (<i>used in navigation database coding</i>)	GARP	GBAS azimuth reference point
FM	From	GBAS†	(<i>to be pronounced "GEE-BAS"</i>) Ground-based augmentation system
FM . . .	From (<i>followed by time weather change is forecast to begin</i>)	GCA‡	Ground controlled approach system <i>or</i> ground controlled approach
FMC	Flight management computer	GEN	General
FMS‡	Flight management system	GEO	Geographic <i>or</i> true
FMU	Flow management unit	GES	Ground earth station
FNA	Final approach	GLD	Glider
FPAP	Flight path alignment point	GLONASS†	(<i>to be pronounced "GLO-NAS"</i>) Global orbiting navigation satellite system
FPL	Filed flight plan (<i>message type designator</i>)	GLS‡	GBAS landing system
FPM	Feet per minute	GMC . . .	Ground movement chart (<i>followed by name/title</i>)
FPR	Flight plan route	GND	Ground
FR	Fuel remaining	GNDCK	Ground check
FREQ	Frequency	GNSS‡	Global navigation satellite system
FRI	Friday	GP	Glide path
FRNG	Firing	GPA	Glide path angle
FRONT†	Front (<i>relating to weather</i>)		
FROST†	Frost (<i>used in aerodrome warnings</i>)		
FRQ	Frequent		
FSL	Full stop landing		
FSS	Flight service station		
FST	First		

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

GPIP	Glide path intercept point	HVDF	High and very high frequency direction-finding stations (<i>at the same location</i>)
GPS‡	Global positioning system	HVY	Heavy
GPWS‡	Ground proximity warning system	HVY	Heavy (<i>used to indicate the intensity of weather phenomena, e.g. HVY RA = heavy rain</i>)
GR	Hail	HX	No specific working hours
GRAS†	(<i>to be pronounced "GRASS"</i>) Ground-based regional augmentation system	HYR	Higher
GRASS	Grass landing area	HZ	Haze
GRIB	Processed meteorological data in the form of grid point values expressed in binary form (<i>meteorological code</i>)	HZ	Hertz (<i>cycle per second</i>)
GRVL	Gravel		
GS	Ground speed	I	
GS	Small hail and/or snow pellets	IAC . . .	Instrument approach chart (<i>followed by name/title</i>)
GUND	Geoid undulation	IAF	Initial approach fix
		IAO	In and out of clouds
H		IAP	Instrument approach procedure
H	High pressure area <i>or</i> the centre of high pressure	IAR	Intersection of air routes
H24	Continuous day and night service	IAS	Indicated airspeed
HA	Holding/racetrack to an altitude	IBN	Identification beacon
HAPI	Helicopter approach path indicator	IC	Ice crystals (<i>very small ice crystals in suspension, also known as diamond dust</i>)
HBN	Hazard beacon	ICE	Icing
HDF	High frequency direction-finding station	ID	Identifier <i>or</i> identify
HDG	Heading	IDENT†	Identification
HEL	Helicopter	IF	Intermediate approach fix
HF‡	High frequency [3 000 to 30 000 kHz]	IFF	Identification friend/foe
HF	Holding/racetrack to a fix	IFR‡	Instrument flight rules
HGT	Height <i>or</i> height above	IGA	International general aviation
HJ	Sunrise to sunset	ILS‡	Instrument landing system
HLDG	Holding	IM	Inner marker
HM	Holding/racetrack to a manual termination	IMC‡	Instrument meteorological conditions
HN	Sunset to sunrise	IMG	Immigration
HO	Service available to meet operational requirements	IMI*	Interrogation sign (question mark) (<i>to be used in AFS as a procedure signal</i>)
HOL	Holiday	IMPR	Improve <i>or</i> improving
HOSP	Hospital aircraft	IMT	Immediate <i>or</i> immediately
HPA	Hectopascal	INA	Initial approach
HR	Hours	INBD	Inbound
HS	Service available during hours of scheduled operations	INC	In cloud
HUD	Head-up display	INCERFA†	Uncertainty phase
HURCN	Hurricane	INFO†	Information
		INOP	Inoperative

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

INP	If not possible	LAM	Logical acknowledgement (<i>message type designator</i>)
INPR	In progress	LAN	Inland
INS	Inertial navigation system	LAT	Latitude
INSTL	Install <i>or</i> installed <i>or</i> installation	LCA	Local <i>or</i> locally <i>or</i> location <i>or</i> located
INSTR	Instrument	LDA	Landing distance available
INT	Intersection	LDAH	Landing distance available, helicopter
INTL	International	LDG	Landing
INTRG	Interrogator	LDI	Landing direction indicator
INTRP	Interrupt <i>or</i> interruption <i>or</i> interrupted	LEN	Length
INTSF	Intensify <i>or</i> intensifying	LF	Low frequency [30 to 300 kHz]
INTST	Intensity	LGT	Light <i>or</i> lighting
IR	Ice on runway	LGTD	Lighted
IRS	Inertial reference system	LIH	Light intensity high
ISA	International standard atmosphere	LIL	Light intensity low
ISB	Independent sideband	LIM	Light intensity medium
ISOL	Isolated	LINE	Line (<i>used in SIGMET</i>)
J			
JAN	January	LM	Locator, middle
JTST	Jet stream	LMT	Local mean time
JUL	July	LNAV†	(<i>to be pronounced “EL-NAV”</i>) Lateral navigation
JUN	June	LNG	Long (<i>used to indicate the type of approach desired or required</i>)
K			
KG	Kilograms	LO	Locator, outer
KHZ	Kilohertz	LOC	Localizer
KIAS	Knots indicated airspeed	LONG	Longitude
KM	Kilometres	LORAN‡	LORAN (<i>long range air navigation system</i>)
KMH	Kilometres per hour	LOSS	Airspeed or headwind loss
KPA	Kilopascal	LPV	Localizer performance with vertical guidance
KT	Knots	LR	The last message received by me was . . . (<i>to be used in AFS as a procedure signal</i>)
KW	Kilowatts	LRG	Long range
L			
. . . L	Left (<i>preceded by runway designation number to identify a parallel runway</i>)	LS	The last message sent by me was . . . <i>or</i> Last message was . . . (<i>to be used in AFS as a procedure signal</i>)
L	Locator (<i>see LM, LO</i>)	LTD	Limited
L	Low pressure area <i>or</i> the centre of low pressure	LTP	Landing threshold point
		LTT	Landline teletypewriter
		LV	Light and variable (<i>relating to wind</i>)
		LVE	Leave <i>or</i> leaving
		LVL	Level
		LVP	Low visibility procedures
		LYR	Layer <i>or</i> layered

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

M

... M	Metres (<i>preceded by figures</i>)
M . . .	Mach number (<i>followed by figures</i>)
M . . .	Minimum value of runway visual range (<i>followed by figures in METAR/SPECI</i>)
MAA	Maximum authorized altitude
MAG	Magnetic
MAHF	Missed approach holding fix
MAINT	Maintenance
MAP	Aeronautical maps and charts
MAPT	Missed approach point
MAR	At sea
MAR	March
MAS	Manual A1 simplex
MATF	Missed approach turning fix
MAX	Maximum
MAY	May
MBST	Microburst
MCA	Minimum crossing altitude
MCW	Modulated continuous wave
MDA	Minimum descent altitude
MDF	Medium frequency direction-finding station
MDH	Minimum descent height
MEA	Minimum en-route altitude
MEHT	Minimum eye height over threshold (<i>for visual approach slope indicator systems</i>)
MET†	Meteorological <i>or</i> meteorology
METAR†	Aerodrome routine meteorological report (<i>in meteorological code</i>)
MET REPORT	Local routine meteorological report (<i>in abbreviated plain language</i>)
MF	Medium frequency [300 to 3 000 kHz]
MHDF	Medium and high frequency direction-finding stations (<i>at the same location</i>)
MHVDF	Medium, high and very high frequency direction-finding stations (<i>at the same location</i>)
MHZ	Megahertz
MID	Mid-point (<i>related to RVR</i>)
MIFG	Shallow fog
MIL	Military

MIN*	Minutes
MIS	Missing . . . (<i>transmission identification to be used in AFS as a procedure signal</i>)
MKR	Marker radio beacon
MLS‡	Microwave landing system
MM	Middle marker
MNM	Minimum
MNPS	Minimum navigation performance specifications
MNT	Monitor <i>or</i> monitoring <i>or</i> monitored
MNTN	Maintain
MOA	Military operating area
MOC	Minimum obstacle clearance (<i>required</i>)
MOCA	Minimum obstacle clearance altitude
MOD	Moderate (<i>used to indicate the intensity of weather phenomena, interference or static reports, e.g. MODRA = moderate rain</i>)
MON	Above mountains
MON	Monday
MOPS†	Minimum operational performance standards
MOV	Move <i>or</i> moving <i>or</i> movement
MPS	Metres per second
MRA	Minimum reception altitude
MRG	Medium range
MRP	ATS/MET reporting point
MS	Minus
MSA	Minimum sector altitude
MSAS†	(<i>to be pronounced “EM-SAS”</i>) Multi-functional transport satellite (MTSAT) satellite-based augmentation system
MSAW	Minimum safe altitude warning
MSG	Message
MSL	Mean sea level
MSR#	Message . . . (<i>transmission identification has been misrouted to be used in AFS as a procedure signal</i>)
MSSR	Monopulse secondary surveillance radar
MT	Mountain
MTU	Metric units
MTW	Mountain waves
MVDF	Medium and very high frequency direction-finding stations (<i>at the same location</i>)

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

MWO	Meteorological watch office	NOTAM†	A notice distributed by means of telecommunication containing information concerning the establishment, condition or change in any aeronautical facility, service, procedure or hazard, the timely knowledge of which is essential to personnel concerned with flight operations
MX	Mixed type of ice formation (<i>white and clear</i>)		
N			
N	No distinct tendency (<i>in RVR during previous 10 minutes</i>)		
N	North <i>or</i> northern latitude	NOV	November
NADP	Noise abatement departure procedure	NOZ‡	Normal operating zone
NASC†	National AIS system centre	NPA	Non-precision approach
NAT	North Atlantic	NR	Number
NAV	Navigation	NRH	No reply heard
NB	Northbound	NS	Nimbostratus
NBFR	Not before	NSC	Nil significant cloud
NC	No change	NSE	Navigation system error
NCD	No cloud detected (<i>used in automated METAR/SPECI</i>)	NSW	Nil significant weather
NDB‡	Non-directional radio beacon	NTL	National
NDV	No directional variations available (<i>used in automated METAR/SPECI</i>)	NTZ‡	No transgression zone
NE	North-east	NW	North-west
NEB	North-eastbound	NWB	North-westbound
NEG	No <i>or</i> negative <i>or</i> permission not granted <i>or</i> that is not correct	NXT	Next
NGT	Night	O	
NIL*†	None <i>or</i> I have nothing to send to you	OAC	Oceanic area control centre
NM	Nautical miles	OAS	Obstacle assessment surface
NML	Normal	OBS	Observe <i>or</i> observed <i>or</i> observation
NN	No name, unnamed	OBSC	Obscure <i>or</i> obscured <i>or</i> obscuring
NNE	North-north-east	OBST	Obstacle
NNW	North-north-west	OCA	Obstacle clearance altitude
NO	No (negative) (<i>to be used in AFS as a procedure signal</i>)	OCA	Oceanic control area
NOF	International NOTAM office	OCC	Occluding (<i>light</i>)
NOSIG†	No significant change (<i>used in trend-type landing forecasts</i>)	OCH	Obstacle clearance height
		OCNL	Occasional <i>or</i> occasionally
		OCS	Obstacle clearance surface
		OCT	October
		OFZ	Obstacle free zone
		OGN	Originate (<i>to be used in AFS as a procedure signal</i>)
		OHD	Overhead
		OIS	Obstacle identification surface
		OK*	We agree <i>or</i> It is correct (<i>to be used in AFS as a procedure signal</i>)

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

OLDI†	On-line data interchange
OM	Outer marker
OPA	Opaque, white type of ice formation
OPC	Control indicated is operational control
OPMET†	Operational meteorological (<i>information</i>)
OPN	Open <i>or</i> opening <i>or</i> opened
OPR	Operator <i>or</i> operate <i>or</i> operative <i>or</i> operating <i>or</i> operational
OPS†	Operations
O/R	On request
ORD	Order
OSV	Ocean station vessel
OTP	On top
OTS	Organized track system
OUBD	Outbound
OVC	Overcast

P

P . . .	Maximum value of wind speed or runway visual range (<i>followed by figures in METAR/SPECI and TAF</i>)
P . . .	Prohibited area (<i>followed by identification</i>)
PA	Precision approach
PALS	Precision approach lighting system (<i>specify category</i>)
PANS	Procedures for air navigation services
PAPI†	Precision approach path indicator
PAR‡	Precision approach radar
PARL	Parallel
PATC . . .	Precision approach terrain chart (<i>followed by name/title</i>)
PAX	Passenger(s)
PBN	Performance-based navigation
PCD	Proceed <i>or</i> proceeding
PCL	Pilot-controlled lighting
PCN	Pavement classification number
PDC‡	Pre-departure clearance
PDG	Procedure design gradient
PER	Performance
PERM	Permanent
PIB	Pre-flight information bulletin
PJE	Parachute jumping exercise
PL	Ice pellets
PLA	Practice low approach

PLN	Flight plan
PLVL	Present level
PN	Prior notice required
PNR	Point of no return
PO	Dust/sand whirls (<i>dust devils</i>)
POB	Persons on board
POSS	Possible
PPI	Plan position indicator
PPR	Prior permission required
PPSN	Present position
PRFG	Aerodrome partially covered by fog
PRI	Primary
PRKG	Parking
PROB†	Probability
PROC	Procedure
PROV	Provisional
PRP	Point-in-space reference point
PS	Plus
PSG	Passing
PSN	Position
PSP	Pierced steel plank
PSR‡	Primary surveillance radar
PSYS	Pressure system(s)
PTN	Procedure turn
PTS	Polar track structure
PWR	Power

Q

QD	Do you intend to ask me for a series of bearings? <i>or</i> I intend to ask you for a series of bearings (<i>to be used in radiotelegraphy as a Q Code</i>)
QDM‡	Magnetic heading (<i>zero wind</i>)
QDR	Magnetic bearing
QFE‡	Atmospheric pressure at aerodrome elevation (<i>or at runway threshold</i>)
QFU	Magnetic orientation of runway
QGE	What is my distance to your station? <i>or</i> Your distance to my station is (<i>distance figures and units</i>) (<i>to be used in radiotelegraphy as a Q Code</i>)
QJH	Shall I run my test tape/a test sentence? <i>or</i> Run your test tape/a test sentence (<i>to be used in AFS as a Q Code</i>)

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

QNH‡	Altimeter sub-scale setting to obtain elevation when on the ground	RB	Rescue boat
QSP	Will you relay to . . . free of charge? or I will relay to . . . free of charge (<i>to be used in AFS as a Q Code</i>)	RCA	Reach cruising altitude
QTA	Shall I cancel telegram number . . . ? or Cancel telegram number . . . (<i>to be used in AFS as a Q Code</i>)	RCC	Rescue coordination centre
QTE	True bearing	RCF	Radiocommunication failure (<i>message type designator</i>)
QTF	Will you give me the position of my station according to the bearings taken by the D/F stations which you control? or The position of your station according to the bearings taken by the D/F stations that I control was . . . latitude . . . longitude (<i>or other indication of position</i>), class . . . at . . . hours (<i>to be used in radiotelegraphy as a Q Code</i>)	RCH	Reach <i>or</i> reaching
QUAD	Quadrant	RCL	Runway centre line
QUJ	Will you indicate the TRUE track to reach you? or The TRUE track to reach me is . . . degrees at . . . hours (<i>to be used in radiotelegraphy as a Q Code</i>)	RCLL	Runway centre line light(s)
R		RCLR	Recleared
. . . R	Right (<i>preceded by runway designation number to identify a parallel runway</i>)	RCP‡	Required communication performance
R	Rate of turn	RDH	Reference datum height
R	Red	RDL	Radial
R . . .	Restricted area (<i>followed by identification</i>)	RDO	Radio
R . . .	Runway (<i>followed by figures in METAR/SPECI</i>)	RE	Recent (<i>used to qualify weather phenomena, e.g. RERA = recent rain</i>)
R*	Received (<i>acknowledgement of receipt</i>) (<i>to be used in AFS as a procedure signal</i>)	REC	Receive <i>or</i> receiver
RA	Rain	REDL	Runway edge light(s)
RA	Resolution advisory	REF	Reference to . . . <i>or</i> refer to . . .
RAC	Rules of the air and air traffic services	REG	Registration
RAG	Ragged	RENL	Runway end light(s)
RAG	Runway arresting gear	REP	Report <i>or</i> reporting <i>or</i> reporting point
RAI	Runway alignment indicator	REQ	Request <i>or</i> requested
RAIM†	Receiver autonomous integrity monitoring	RERTE	Re-route
RASC†	Regional AIS system centre	RESA	Runway end safety area
RASS	Remote altimeter setting source	RF	Constant radius arc to a fix
		RG	Range (<i>lights</i>)
		RHC	Right-hand circuit
		RIF	Reclearance in flight
		RIME†	Rime (<i>used in aerodrome warnings</i>)
		RITE	Right (<i>direction of turn</i>)
		RL	Report leaving
		RLA	Relay to
		RLCE	Request level change en route
		RLLS	Runway lead-in lighting system
		RLNA	Request level not available
		RMK	Remark
		RNAV†	(<i>to be pronounced "AR-NAV"</i>) Area navigation
		RNG	Radio range
		RNP‡	Required navigation performance
		ROBEX†	Regional OPMET bulletin exchange (<i>scheme</i>)
		ROC	Rate of climb
		ROD	Rate of descent
		RON	Receiving only
		RPDS	Reference path data selector

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

RPI‡	Radar position indicator
RPL	Repetitive flight plan
RPLC	Replace <i>or</i> replaced
RPS	Radar position symbol
RPT*	Repeat <i>or</i> I repeat (<i>to be used in AFS as a procedure signal</i>)
RQ*	Request (<i>to be used in AFS as a procedure signal</i>)
RQMNTS	Requirements
RQP	Request flight plan (<i>message type designator</i>)
RQS	Request supplementary flight plan (<i>message type designator</i>)
RR	Report reaching
RRA	(<i>or RRB, RRC . . . etc., in sequence</i>) Delayed meteorological message (<i>message type designator</i>)
RSC	Rescue sub-centre
RSCD	Runway surface condition
RSP	Responder beacon
RSR	En-route surveillance radar
RSS	Root sum square
RTD	Delayed (<i>used to indicate delayed meteorological message; message type designator</i>)
RTE	Route
RTF	Radiotelephone
RTG	Radiotelegraph
RTHL	Runway threshold light(s)
RTN	Return <i>or</i> returned <i>or</i> returning
RTODAH	Rejected take-off distance available, helicopter
RTS	Return to service
RTT	Radioteletypewriter
RTZL	Runway touchdown zone light(s)
RUT	Standard regional route transmitting frequencies
RV	Rescue vessel
RVR‡	Runway visual range
RVSM‡	Reduced vertical separation minimum (300 m (1 000 ft)) between FL 290 and FL 410
RWY	Runway

S

S	South <i>or</i> southern latitude
S . . .	State of the sea (<i>followed by figures in METAR/SPECI</i>)
SA	Sand
SALS	Simple approach lighting system
SAN	Sanitary
SAP	As soon as possible
SAR	Search and rescue
SARPS	Standards and Recommended Practices [ICAO]
SAT	Saturday
SATCOM†	Satellite communication
SB	Southbound
SBAS†	(<i>to be pronounced “ESS-BAS”</i>) Satellite-based augmentation system
SC	Stratocumulus
SCT	Scattered
SD	Standard deviation
SDBY	Stand by
SDF	Step down fix
SE	South-east
SEA	Sea (<i>used in connection with sea-surface temperature and state of the sea</i>)
SEB	South-eastbound
SEC	Seconds
SECN	Section
SECT	Sector
SELCAL†	Selective calling system
SEP	September
SER	Service <i>or</i> servicing <i>or</i> served
SEV	Severe (<i>used e.g. to qualify icing and turbulence reports</i>)
SFC	Surface
SG	Snow grains
SGL	Signal
SH . . .	Shower (<i>followed by RA = rain, SN = snow, PL = ice pellets, GR = hail, GS = small hail and/or snow pellets or combinations thereof, e.g. SHRASN = showers of rain and snow</i>)
SHF	Super high frequency [3 000 to 30 000 MHz]
SI	International system of units
SID†	Standard instrument departure

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

SIF	Selective identification feature	SSW	South-south-west
SIG	Significant	ST	Stratus
SIGMET†	Information concerning en-route weather phenomena which may affect the safety of aircraft operations	STA	Straight-in approach
SIMUL	Simultaneous <i>or</i> simultaneously	STAR†	Standard instrument arrival
SIWL	Single isolated wheel load	STD	Standard
SKED	Schedule <i>or</i> scheduled	STF	Stratiform
SLP	Speed limiting point	STN	Station
SLW	Slow	STNR	Stationary
SMC	Surface movement control	STOL	Short take-off and landing
SMR	Surface movement radar	STS	Status
SN	Snow	STWL	Stopway light(s)
SNOCLO	Aerodrome closed due to snow (<i>used in METAR/SPECI</i>)	SUBJ	Subject to
SNOWTAM†	Special series NOTAM notifying the presence or removal of hazardous conditions due to snow, ice, slush or standing water associated with snow, slush and ice on the movement area, by means of a specific format	SUN	Sunday
SOC	Start of climb	SUP	Supplement (<i>AIP Supplement</i>)
SPECI†	Aerodrome special meteorological report (<i>in meteorological code</i>)	SUPPS	Regional supplementary procedures
SPECIAL†	Local special meteorological report (<i>in abbreviated plain language</i>)	SVC	Service message
SPI	Special position indicator	SVCBL	Serviceable
SPL	Supplementary flight plan (<i>message type designator</i>)	SW	South-west
SPOC	SAR point of contact	SWB	South-westbound
SPOT†	Spot wind	SWY	Stopway
SQ	Squall		
SQL	Squall line	T	
SR	Sunrise	T	Temperature
SRA	Surveillance radar approach	... T	True (<i>preceded by a bearing to indicate reference to True North</i>)
SRE	Surveillance radar element of precision approach radar system	TA	Traffic advisory
SRG	Short range	TA	Transition altitude
SRR	Search and rescue region	TAA	Terminal arrival altitude
SRY	Secondary	TACAN†	UHF tactical air navigation aid
SS	Sandstorm	TAF†	Aerodrome forecast (<i>in meteorological code</i>)
SS	Sunset	TA/H	Turn at an altitude/height
SSB	Single sideband	TAIL†	Tail wind
SSE	South-south-east	TAR	Terminal area surveillance radar
SSR‡	Secondary surveillance radar	TAS	True airspeed
SST	Supersonic transport	TAX	Taxiing <i>or</i> taxi
		TC	Tropical cyclone
		TCAC	Tropical cyclone advisory centre
		TCAS RA†	(<i>to be pronounced "TEE-CAS-AR-AY"</i>) Traffic alert and collision avoidance system resolution advisory
		TCH	Threshold crossing height
		TCU	Towering cumulus
		TDO	Tornado

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

TDZ	Touchdown zone	TS . . .	Thunderstorm (followed by RA = rain, SN = snow, PL = ice pellets, GR = hail, GS = small hail and/or snow pellets or combinations thereof, e.g. TSRASN = thunderstorm with rain and snow)
TECR	Technical reason	TSUNAMI†	Tsunami (used in aerodrome warnings)
TEL	Telephone	TT	Teletypewriter
TEMPO†	Temporary or temporarily	TUE	Tuesday
TF	Track to fix	TURB	Turbulence
TFC	Traffic	T-VASIS†	(to be pronounced “TEE-VASIS”) T visual approach slope indicator system
TGL	Touch-and-go landing	TVOR	Terminal VOR
TGS	Taxiing guidance system	TWR	Aerodrome control tower or aerodrome control
THR	Threshold	TWY	Taxiway
THRU	Through	TWYL	Taxiway-link
THU	Thursday	TX . . .	Maximum temperature (followed by figures in TAF)
TIBA†	Traffic information broadcast by aircraft	TXT*	Text (when the abbreviation is used to request a repetition, the question mark (IMI) precedes the abbreviation, e.g. IMI TXT) (to be used in AFS as a procedure signal)
TIL†	Until	TYP	Type of aircraft
TIP	Until past . . . (place)	TYPH	Typhoon
TKOF	Take-off		
TL . . .	Till (followed by time by which weather change is forecast to end)	U	
TLOF	Touchdown and lift-off area	U	Upward (tendency in RVR during previous 10 minutes)
TMA‡	Terminal control area	UA	Unmanned aircraft
TN . . .	Minimum temperature (followed by figures in TAF)	UAB . . .	Until advised by . . .
TNA	Turn altitude	UAC	Upper area control centre
TNH	Turn height	UAR	Upper air route
TO . . .	To . . . (place)	UAS	Unmanned aircraft system
TOC	Top of climb	UDF	Ultra high frequency direction-finding station
TODA	Take-off distance available	UFN	Until further notice
TODAH	Take-off distance available, helicopter	UHDT	Unable higher due traffic
TOP†	Cloud top	UHF‡	Ultra high frequency [300 to 3 000 MHz]
TORA	Take-off run available	UIC	Upper information centre
TOX	Toxic	UIR‡	Upper flight information region
TP	Turning point	ULR	Ultra long range
TR	Track	UNA	Unable
TRA	Temporary reserved airspace		
TRANS	Transmits or transmitter		
TREND†	Trend forecast		
TRL	Transition level		
TROP	Tropopause		
TS	Thunderstorm (in aerodrome reports and forecasts, TS used alone means thunder heard but no precipitation at the aerodrome)		

† When radiotelephony is used, the abbreviations and terms are transmitted as spoken words.

‡ When radiotelephony is used, the abbreviations and terms are transmitted using the individual letters in non-phonetic form.

* Signal is also available for use in communicating with stations of the maritime mobile service.

Signal for use in the teletypewriter service only.

UNAP	Unable to approve	VNAV†	(<i>to be pronounced “VEE-NAV”</i>) Vertical navigation
UNL	Unlimited	VOLMET†	Meteorological information for aircraft in flight
UNREL	Unreliable	VOR‡	VHF omnidirectional radio range
UP	Unidentified precipitation (<i>used in automated METAR/SPECI</i>)	VORTAC†	VOR and TACAN combination
U/S	Unserviceable	VOT	VOR airborne equipment test facility
UTA	Upper control area	VPA	Vertical path angle
UTC‡	Coordinated Universal Time	VPT	Visual manoeuvre with prescribed track
V		VRB	Variable
... V ...	Variations from the mean wind direction (<i>preceded and followed by figures in METAR/SPECI, e.g. 350V070</i>)	VSA	By visual reference to the ground
VA	Heading to an altitude	VSP	Vertical speed
VA	Volcanic ash	VTF	Vector to final
VAAC	Volcanic ash advisory centre	VTOL	Vertical take-off and landing
VAC ...	Visual approach chart (<i>followed by name/title</i>)	VV ...	Vertical visibility (<i>followed by figures in METAR/SPECI and TAF</i>)
VAL	In valleys	W

DESIGNATION OF TYPICAL RADIOCOMMUNICATION EMISSIONS

<i>Type of modulation of main carrier</i>	<i>Type of transmission</i>	<i>Supplementary characteristics</i>	<i>Abbre- viation</i>	
None	Continuous wave	—	NON	
Amplitude modulation	Telegraphy without the use of a modulating audio frequency (by on-off keying)	—	A1A	
	Telegraphy by the on-off keying of an amplitude-modulating audio frequency or audio frequencies, or by the on-off keying of the modulated emission (special case: an unkeyed emission amplitude modulated)	—	A2A	
	Telephony	Double sideband		A3A
		Single sideband, reduced carrier		R3E
		Single sideband, full carrier		H3E
		Single sideband, suppressed carrier		J3E
		Two independent sidebands containing quantized or digital information		B7E
		Two independent sidebands containing analogue information		B8E
	Facsimile (by sub-carrier frequency modulation)	—		A4
		Single sideband, reduced carrier		R3C
Single sideband, suppressed carrier			J3C	
Television		Vestigial sideband		C3F
	Multichannel voice-frequency telegraphy	Single sideband, reduced carrier		R7B
	Cases not covered by the above, e.g. a combination of telephony and telegraphy	Two independent sidebands		B9W
Frequency (<i>or phase</i>) modulation	Telegraphy by frequency shift keying without the use of a modulating audio frequency: one of two frequencies being emitted at any instant	—	F1A	
	Telegraphy by the on-off keying of a frequency modulating audio frequency or by the on-off keying of a frequency modulated emission (special case: an unkeyed emission, frequency modulated)	—	F2A	
	Telephony	—	F3E	
	Facsimile by direct frequency modulation of the carrier	—	F1C	
	Television	—	F3F	

<i>Type of modulation of main carrier</i>	<i>Type of transmission</i>	<i>Supplementary characteristics</i>	<i>Abbreviation</i>
	Four-frequency duplex telegraphy	—	F7B
Pulse modulation	A pulsed carrier without any modulation intended to carry information (e.g. radar)	—	P0N
	Telegraphy by the on-off keying of a pulsed carrier without the use of a modulating audio frequency	—	P1D
<p><i>Note.— Emissions where the main character is directly modulated by a signal which has been coded into quantized form (e.g. pulse code modulation) should be designated by the appropriate emission under Amplitude or Frequency modulation, above.</i></p>			
	Cases not covered by the above in which the main carrier is pulse modulated		WXX

Note.— For additional assistance, see ITU Radio Regulations, Appendix 1 and Recommendation ITU-R SM.1138.

SIGNAL REPORTING CODES

**Codes for use in the international aeronautical telecommunication service
for the preparation of messages relating to monitoring, propagation
disturbance and radio interference reports**

Introduction

1. A signal report shall consist of the code word SINPO or SINPFEMO followed by a five- or eight-figure group respectively rating the five or eight characteristics of the signal code.
2. The letter X shall be used instead of a numeral for characteristics not rated.
3. Although the code word SINPFEMO is intended for telephony, either code word may be used for telegraphy or telephony as may be desired.

SINPO Signal Reporting Code

Rating scale	S	I	N	P	O
	Signal strength	<i>Degrading effect of</i>			Overall readability (QRK)
		Interference (QRM)	Noise (QRN)	Propagation disturbance	
5	Excellent	Nil	Nil	Nil	Excellent
4	Good	Slight	Slight	Slight	Good
3	Fair	Moderate	Moderate	Moderate	Fair
2	Poor	Severe	Severe	Severe	Poor
1	Barely audible	Extreme	Extreme	Extreme	Unusable

SINPFEMO Signal Reporting Code

Rating scale	S	I	N	P	F	E	M	O
	Signal strength	<i>Degrading effect of</i>			Frequency of fading	<i>Modulation</i>		Overall rating
		Interference (QRM)	Noise (QRN)	Propagation disturbance		Quality	Depth	
5	Excellent	Nil	Nil	Nil	Nil	Excellent	Maximum	Excellent
4	Good	Slight	Slight	Slight	Slow	Good	Good	Good
3	Fair	Moderate	Moderate	Moderate	Moderate	Fair	Fair	Fair
2	Poor	Severe	Severe	Severe	Fast	Poor	Poor or Nil	Poor
1	Barely audible	Extreme	Extreme	Extreme	Very fast	Very poor	Continuously overmodulated	Unusable

THE NOTAM CODE

PREFACE

(See 5.2.2 and Appendix 6 of Annex 15)

1. Introduction

The NOTAM Code is provided to enable the coding of information regarding the establishment, condition or change of radio aids, aerodromes and lighting facilities, dangers to aircraft, or search and rescue facilities. The NOTAM Code is a comprehensive description of information contained in NOTAM. It serves as an important criterion for storage and retrieval of information, as well as for deciding whether an item is of operational significance or not. It also establishes the relevance of the NOTAM to the various types of flight operations and determines whether it must therefore be part of a pre-flight information bulletin. In addition, it assists in specifying those items which are subject to immediate notification processes. The NOTAM Code also standardizes the presentation of the related plain-language text required at Item E) of the NOTAM Format as contained in Appendix 6 of Annex 15. Thus, the NOTAM Code is the basis for determination of the qualifiers TRAFFIC, PURPOSE and SCOPE used in Q (Qualifiers) line and the related text to appear in Item E) of the NOTAM Format.

2. Procedures

The transmission of NOTAM over the international aeronautical telecommunication service is governed by the appropriate sections of Annex 10, Volume II, and Annex 15. The former contains information on the acceptability of and priority to be accorded to NOTAM for transmission over the aeronautical fixed service (AFS), the latter full instructions on the textual format and contents of NOTAM.

3. Composition

General

3.1 All NOTAM Code groups contain a total of five (5) letters. The first letter of the code group is always the letter Q to indicate that it is a code abbreviation for use in the composition of NOTAM. The letter Q has been chosen to avoid conflict with any assigned radio call sign.

3.2 The second and third letters identify the subject reported upon and the fourth and fifth letters denote its status of operation. The code identifying the subject or denoting its status of operation is, whenever possible, self-evident. Where more than one subject could be identified by the same self-evident code, the most important subject is chosen.

3.3 If the subject of the NOTAM is not listed in the NOTAM Code, insert "XX" as the second and third letters.

3.4 If the condition of the subject is not listed in the NOTAM Code, insert "XX" as the fourth and fifth letters.

3.5 When a NOTAM is issued containing a checklist of valid NOTAM, use KKKK as the second, third, fourth and fifth letters. When a NOTAM containing operationally significant information is issued in accordance with Appendix 4 and Chapter 6 of Annex 15 and when it is used to announce the existence of AIRAC AIP amendments or supplements (trigger NOTAM), insert "TT" as the fourth and fifth letters.

Classification by subject (second and third letters)

3.6 Facilities, services and other information which require coding have been classified by subject into sections and subsections. The second letter of the code group, which may be any letter of the alphabet except Q, indicates the subject subsections as follows:

AGA (Aerodromes)

.....	<u>L</u> IGHTING facilities	— L
.....	<u>M</u> OVEMENT and landing area	— M
.....	<u>F</u> ACILITIES and services	— F

ATM (Air Traffic Management)

.....	<u>A</u> IRSPACE organization	— A
.....	air traffic and VOLMET <u>S</u> ERVICES	— S
.....	air traffic <u>P</u> ROCEDURES	— P

CNS (Communications, Navigation and Surveillance)

.....	<u>C</u> OMMUNICATION and radar facilities	— C
.....	<u>I</u> NSTRUMENT and microwave landing systems	— I
.....	<u>G</u> NSS services	— G
.....	terminal and en-route <u>N</u> AVIGATION facilities	— N

Navigation Warnings

.....	airspace <u>R</u> ESTRICTIONS	— R
.....	<u>W</u> ARNINGS	— W

Other Information

.....	<u>O</u> THER information	— O
-------	---------------------------	-----

Classification by status (fourth and fifth letters)

3.7 The fourth letter of the code group, which may be any letter of the alphabet except Q, indicates status subsections as follows:

A	<u>A</u> VAILABILITY
C	<u>C</u> HANGES
H	<u>H</u> AZARD conditions
L	<u>L</u> IMITATIONS
XX	Other

3.8 The following fourth and fifth letters of the NOTAM Code should be used in NOTAM cancellations:

- AK: RESUMED NORMAL OPERATION
- AL: OPERATIVE (OR REOPERATIVE) SUBJECT TO PREVIOUSLY PUBLISHED LIMITATIONS/CONDITIONS
- AO: OPERATIONAL
- CC: COMPLETED
- XX: PLAIN LANGUAGE

4. Significations/uniform abbreviated phraseology

The significations/approved uniform abbreviated phraseology assigned to NOTAM Code groups, as required for use in Item E) of the NOTAM Format (Annex 15, Appendix 6), are to be amplified or completed where necessary by the addition of appropriate location indicators, name of station, geographical coordinates, abbreviations, frequencies, call signs, figures and plain language. ICAO abbreviations are to be used in preference to plain language wherever possible. In order to facilitate the dissemination of NOTAM by reducing the transmission time over telecommunication channels, eliminate translation and provide a suitable pre-flight information bulletin entry, the approved uniform abbreviated phraseology assigned to each signification of a two-letter combination in the NOTAM Code — Decode part is to be used in preference to significations wherever possible.

Note.— In addition, to meet certain requirements, a State may wish to provide a translation of the approved uniform phraseology in another language.

5. Text in parentheses

The information necessary to complete a signification/uniform abbreviated phraseology, as indicated between parentheses, shall be given as applicable.

6. Amplification of significations/uniform abbreviated phraseology

The following is applicable to amplification of significations/uniform abbreviated phraseology:

- a) amplifications relating to significations/uniform abbreviated phraseology of the second and third letters (subject of the NOTAM) must *precede* signification/uniform abbreviated phraseology of the NOTAM Code;
- b) amplifications relating to significations/uniform abbreviated phraseology of the fourth and fifth letters (status of operation) must *follow* signification/uniform abbreviated phraseology of the NOTAM Code.

Examples (as applicable to Item E) of the NOTAM Format)

- a) The touchdown zone lights of RWY 27 are not available due to power failure.

E) RWY 27 RTZL NOT AVBL DUE PWR FAILURE

- b) The taxiway edge lights of taxiway B are obscured by snow.
E) TWY B EDGE LGT OBSCURED BY SN
- c) On the strip of RWY 09/27 snow banks to a height of 15 ft exist.
E) RWY 09/27 STRIP SN BANKS HGT 15 FT
- d) The minimum sector altitude in the sector 90° to 180° inbound VOR ident DOM changed to 3 600 ft MSL.
E) 90 TO 180 DEG INBD VOR DOM MSA CHANGED 3 600 FT MSL

7. Use of NOTAM Code groups

7.1 Five-letter NOTAM Code groups are to be used in conjunction with the NOTAM Format (Annex 15, 5.2.1, 5.3.2 and Appendix 6). They also constitute the basis for determination of the qualifiers Traffic, Purpose and Scope. Both NOTAM Code groups and NOTAM qualifiers are to be inserted in Q (Qualifiers) line of the NOTAM Format.

Note.— The most commonly used NOTAM Code groups and their respective relation with the qualifiers Traffic, Purpose and Scope are presented in the NOTAM Selection Criteria tables (Doc 8126 — Aeronautical Information Services Manual, Attachment to Appendix C).

7.2 Five-letter NOTAM Code groups are formed in the following manner:

FIRST LETTER

The letter Q (see 3.1).

SECOND AND THIRD LETTERS

The appropriate combination of two letters selected from the “Second and Third Letters” section of the NOTAM Code to identify the facility, service or danger to aircraft being reported upon. (See 3.3, 3.5 and 3.6.)

FOURTH AND FIFTH LETTERS

The appropriate combination of two letters selected from the “Fourth and Fifth Letters” section of the NOTAM Code to denote the status of operation of the facility, service or danger to aircraft reported upon. (See 3.4, 3.5 and 3.7.)

Examples

Note.— In the examples of NOTAM below, the letters Q to G inclusive, each followed by a closing parenthesis, identify an item in the NOTAM Format (Annex 15, Appendix 6).

- a) The distance measuring equipment (DME), at Paris/Orly, will not be available from the 31st day of March 1992 at 2359 UTC until the 1st day of April 1992 at 0600 UTC.

NOTAM:

Q) LFFF/QNDAU/IV/BO/AE/ . . .
 A) LFPO B) 9203312359 C) 9204010600
 E) DME NOT AVBL

Meaning of NOTAM:

Item Q):

- LFFF: ICAO location indicator identifying Paris FIR in which the facility reported on is located;
- QNDAU: The letter “Q” identifies the five-letter code group as the NOTAM Code group. Second and third letters “ND” identifying “distance measuring equipment” and fourth and fifth letters “AU” denoting that the facility is “not available”;
- IV: Letters identifying that the information affects both IFR and VFR traffic;
- BO: Letters identifying that NOTAM is selected for pre-flight information bulletins entry and that it is operationally significant information for IFR flights;
- AE: Letters identifying that facility is serving a dual purpose as terminal and en-route aid.

Item A):

- LFPO: ICAO location indicator identifying Paris/Orly, the location of the facility being reported on.

Item B):

- 9203312359: Date/time group of the beginning of the period of validity in which the facility is not available.

Item C):

- 9204010600: Date/time group of the end of the period of validity in which the facility is not available.

Item E):

- DME NOT AVBL: Plain-language entry using ICAO abbreviations.

- b) With immediate effect, the VHF omnidirectional radio range on frequency 116.9 MHz at New York/La Guardia will be out of service until approximately the 13th day of November 1992 at 0900 UTC.

NOTAM:

Q) KZWY/QNVA/IV/BO/AE/ . . .
 A) KLG A) 9211020615 C) 9211130900 EST
 E) 116.9 MHz VOR U/S

Note.— In the above example, the amplification (i.e. VOR frequency 116.9 MHz) relating to the second and third letters precedes the NOTAM Code signification.

- c) Runway 30 at Stockholm/Bromma is permanently closed for VFR operations.

NOTAM:

- Q) ESOS/QMRLV/V/NB/A/ . . .
A) ESSB B) 9210221430 C) PERM
E) RWY 30 CLSD TO VFR OPS

- d) The VHF omnidirectional radio range on frequency 116.30 MHz station VOZICE in PRAHA FIR will be out of service from the 10th day of November 1992 at 0800 UTC until the 13th day of November 1992 at 0900 UTC.

NOTAM:

- Q) LKAA/QNVAS/IV/BO/E/ . . .
A) LKAA B) 9211100800 C) 9211130900
E) VOZ 116.30 MHZ VOR U/S

Note.— In the above example, the amplification (i.e. station identification VOZ and VOR frequency 116.30 MHz) relating to the second and third letters precedes the NOTAM Code signification.

- e) In the Montreal FIR, gunfiring will take place on the 21st day of February 1993 from 0800 UTC until 1100 UTC within an area of 10 NM radius around the location 45°37' North, 74°00' West from the surface up to an altitude of 6 100 m (20 000 ft) MSL.

NOTAM:

- Q) CZUL/QWMLW/IV/BO/W/000/200/4537N07400W010
A) CZUL B) 9302210800 C) 9302211100
E) GUN FRNG WILL TAKE PLACE RADIUS 10 NM AROUND 4537N07400W
F) SFC G) 6100 M (20000 FT) MSL

Helicopter approach path indicator	LU	Stopbar (<i>specify taxiway</i>)	MO
Heliport lighting	LW	Stopway (<i>specify runway</i>)	MS
High intensity runway lights (<i>specify runway</i>)	LH	Strip/shoulder (<i>specify runway</i>)	MW
Landing direction indicator lights	LD	Taxiing guidance system	MG
Low intensity runway lights (<i>specify runway</i>)	LL	Taxiway(s) (<i>specify</i>)	MX
Medium intensity runway lights (<i>specify runway</i>)	LM	Threshold (<i>specify runway</i>)	MT
Pilot-controlled lighting	LG	AGA	
Precision approach path indicator (<i>specify runway</i>)	LP	Facilities and services (F)	
Runway alignment indicator lights (<i>specify runway</i>)	LJ	Aerodrome	FA
Runway centre line lights (<i>specify runway</i>)	LC	Aircraft de-icing (<i>specify</i>)	FI
Runway edge lights (<i>specify runway</i>)	LE	Ceiling measurement equipment	FC
Runway end identifier lights (<i>specify runway</i>)	LI	Customs/immigration	FZ
Runway touchdown zone lights (<i>specify runway</i>)	LZ	Docking system (<i>specify AGNIS, BOLDS, etc.</i>)	FD
Sequenced flashing lights (<i>specify runway</i>)	LF	Firefighting and rescue	FF
Stopway lights (<i>specify runway</i>)	LS	Fog dispersal system	FO
Taxiway centre line lights (<i>specify taxiway</i>)	LX	Friction measuring device (<i>specify type</i>)	FB
Taxiway edge lights (<i>specify taxiway</i>)	LY	Fuel availability	FU
Threshold lights (<i>specify runway</i>)	LT	Ground movement control	FG
Visual approach slope indicator system (<i>specify type and runway</i>)	LV	Helicopter alighting area/platform	FH
AGA		Heliport	FP
Movement and landing area (M)		Landing direction indicator	FL
Aircraft stands (<i>specify</i>)	MP	Meteorological service (<i>specify type</i>)	FM
Apron	MN	Oils (<i>specify type</i>)	FJ
Bearing strength (<i>specify part of landing area or movement area</i>)	MB	Oxygen (<i>specify type</i>)	FE
Clearway (<i>specify runway</i>)	MC	Snow removal equipment	FS
Daylight markings (<i>specify threshold, centre line, etc.</i>)	MM	Transmissometer (<i>specify runway and, where applicable, designator(s) of transmissometer(s)</i>)	FT
Declared distances (<i>specify runway</i>)	MD	Wind direction indicator	FW

Availability (A)		Hazard Conditions (H)	
Available for daylight operation	AD	Approach according to signal area only	HT
Available for night operation	AN	Bird migration in progress (<i>specify direction</i>)	HK
Available on request	AR	Braking action is . . .	HA
Available, prior permission required	AP	1) Poor	
Completely withdrawn	AW	2) Medium/Poor	
Flight checked and found reliable	AF	3) Medium	
Hours of service are now . . . (<i>specify</i>)	AH	4) Medium/Good	
Military operations only	AM	5) Good	
Not available (<i>specify reason if appropriate</i>)	AU	Concentration of birds	HX
Operating but ground checked only, awaiting flight check	AG	Covered by compacted snow to a depth of	HC
Operational	AO	Covered by dry snow to a depth of	HD
Operative (<i>or reoperative</i>) subject to previously published limitations/conditions	AL	Covered by frozen ruts and ridges	HZ
Previously promulgated shutdown has been cancelled	AX	Covered by ice	HI
Resumed normal operation	AK	Covered by water to a depth of	HE
Unserviceable	AS	Covered by wet snow or slush to a depth of	HN
Withdrawn for maintenance	AC	Friction coefficient is . . . (<i>specify friction measuring device used</i>)	HB
Changes (C)		Grass cutting in progress	HG
Activated	CA	Hazard due to (<i>specify</i>)	HH
Cancelled	CN	Launch in progress . . . (<i>specify balloon flight identification or project code name, launch site, date/time of launch(es), estimated time passing 18 000 m (60 000 ft), or reaching cruising level if at or below 18 000 m (60 000 ft), together with estimated location, estimated date/time of termination of the flight and planned location of ground contact, when applicable</i>)	HU
Changed	CH	Launch planned . . . (<i>specify balloon flight identification or project code name, launch site, planned period of launch(es) — date/time, expected climb direction, estimated time to pass 18 000 m (60 000 ft), or reaching cruising level if at or below 18 000 m (60 000 ft), together with estimated location</i>)	HJ
Completed	CC	Marked by	HM
Deactivated	CD	Obscured by snow	HO
Displaced	CM	Operation cancelled . . . (<i>specify balloon flight identification or project code name</i>)	HQ
Downgraded to	CG	Sanding in progress	HS
Erected	CE		
Identification or radio call sign changed to	CI		
Installed	CS		
On test, do not use	CT		
Operating	CO		
Operating frequency(ies) changed to	CF		
Operating on reduced power	CP		
Realigned	CL		
Temporarily replaced by	CR
